Instructor: Edgar Stach

Time: 1:00 - 4:00 ARCH 425-002 or 525-002 3 credit hours

Instructor: James Rose

Team Tennessee Living Light has been accepted in the Solar Decathlon 2011! This is an exciting kick-off class for the next 16 months of work towards the competition. This class is open to all majors, but we are particularly looking for students who want to make a commitment to Team Tennessee for the remainder of the decathlon. A second summer session course may also be available and many other courses are going to be developed.

This class will develop the design through modeling and testing prototypes. During the design process, we kept returning to the phrase *Living Light* for inspiration. We have incorporated multiple interpretations of this concept into the design including maximizing transparency and open space, minimizing energy use, and incorporating built-in storage.
